L-3's Cargo Solutions Featured at the Second Annual WCO Technology & Innovation Forum in Cairo

WOBURN, Mass., October 28, 2010 – L-3 Security & Detection Systems is sponsoring the Second Annual World Customs Organization (WCO) Technology & Innovation Forum to be held in Cairo, Egypt, at the JW Marriott from November 2 through November 4. This forum is a premier event where customs executives, government officials and commercial providers meet to explore emerging trends and requirements in cargo security. Topics include how to best apply the latest technologies and methods to derive practical benefits. This year, the event has a special focus on the efficient use of technology for border security applications.

“L-3 is pleased to be the corporate sponsor for the WCO Technology & Innovation Forum and support this gathering of industry leaders,” said Thomas M. Ripp, president of L-3 Security & Detection Systems. “L-3 has been providing cargo solutions for more than 10 years with practical experience in the border, port and air cargo environments using advanced imaging technology that speeds the screening of consolidated cargo by helping customs personnel identify suspicious content more efficiently.”

Paul Simpson, senior director of L-3's Cargo Solutions, will present a keynote address on border security issues on Tuesday, November 2 at 10 a.m. (EET) in the Tutankhamun II Room. L-3 will also host a breakout session on Wednesday, November 3 at 3:30 p.m. (EET) in the Tutankhamun III Room. Interested parties are invited to visit L-3 in stand 7/8, or contact Theresa Taft at Theresa.Taft@L-3com.com to set up an appointment.

L-3 Security & Detection Systems offers total cargo solutions that serve a full range of environments and applications, providing a configurable family of platforms with a multitude of options. Capabilities include dual-energy material discrimination and a range of energy levels to improve detection, as well as a selection of throughput levels in varying footprints, which simplifies integration into existing operations. All of L-3's cargo solutions are based on an extendable software platform that integrates X-ray images with other sensors and data to create a custom and unified view of the critical information that analysts need to assess risks.

With a significant global presence, L-3 provides comprehensive support both during and after deployment.

About L-3 Security & Detection Systems

With a broad range of systems and technology and an installed base of more than 20,000 systems worldwide, L-3 Security & Detection Systems offers screening technologies for numerous security applications, including aviation systems for hold baggage explosives detection and checkpoint screening, cargo and air freight screening, port and border inspection, and facility protection. L-3 Security & Detection Systems' customer base includes the U.S. military and numerous government agencies, major airports and airlines, national and local authorities, and high-risk commercial enterprises throughout the world.
