L-3 Security & Detection Systems' Multi-View Platform Meets European Requirements for Liquid Explosive Detection Systems at Checkpoints

WOBURN, Mass., June 1, 2011 – L-3 Security & Detection Systems announced today that its ACX[®] 6.4-MV, a next-generation Advanced Technology (AT) X-ray system, meets European requirements for Liquid Explosive Detection Systems (LEDS), which qualifies the system to screen for liquid explosives at airport checkpoints.

The evaluation of the three-view ACX 6.4-MV with Optosecurity XMS[®] for Type C LEDS was made within the Common Evaluation Process (CEP) of the European Civil Aviation Conference (ECAC). This evaluation follows rigorous testing in accordance with the Common Testing Methodology for LEDS, carried out by the Fraunhofer Institute for Chemical Technology (ICT) in cooperation with the German Federal Police Technology Centre.

“We are proud to add this European evaluation to our multi-view platform, which has received prior approvals from the U.S. Transportation Security Administration (TSA) for checkpoint and air cargo screening,” said Thomas M. Ripp, president of L-3 Security & Detection Systems. “L-3 is now able to provide customers worldwide with a solution that meets regulatory requirements and delivers effective explosives detection in a high-throughput, compact and upgradeable AT platform with a low cost of ownership.”

About L-3 Security & Detection Systems

With more than 50,000 systems deployed and supported around the globe, L-3 Security & Detection Systems (SDS) is a leading supplier of security screening solutions. For more than 30 years, L-3 SDS has developed and manufactured cutting-edge products using advanced technologies that include 3-D computed tomography; automated, conventional and high-energy X-ray; active millimeter wave imaging; metal detection; and energetic trace explosives detection. The company's solutions are used by the aviation and transportation industries, regulatory and customs authorities, government and law enforcement agencies, and commercial and other secure facilities. Applications include the screening of people, vehicles, baggage, cargo and packages for explosives, firearms, drugs, contraband and intellectual

property. To learn more about L-3 SDS, please visit the company's website at www.L-3com.com/sds.

About L-3 Communications

Headquartered in New York City, L-3 Communications employs approximately 63,000 people worldwide and is a prime contractor in C³ISR (Command, Control, Communications, Intelligence, Surveillance and Reconnaissance) systems, aircraft modernization and maintenance, and government services. L-3 is also a leading provider of a broad range of electronic systems used on military and commercial platforms. The company reported 2010 sales of \$15.7 billion.
