L-3 Security & Detection Systems Successfully Installs Hold Baggage Scanning Solution for New Terminal at Kosovo Airport

WOBURN, Mass., February 12, 2014 – L-3 Security & Detection Systems (L-3 SDS) announced today that it has successfully completed installation of explosives detection systems (EDS) for the new international terminal building at Pristina International Airport Adem Jashari in the Republic of Kosovo. L-3 SDS supplied a complete hold baggage scanning solution consisting of its eXaminer[®] 3DX-ES and MVT-HR[®] EDS, as well as OptEX[®] explosives trace detection systems, workstations and an OptiNet[™] networking infrastructure.

This networked solution optimizes X-ray scanning and image analysis technologies to examine checked bags for potential explosives threats.

“Our advanced hold baggage system provides Pristina with a networked, efficient and upgradable explosives detection solution designed to meet the international airport’s demanding screening requirements,” said Thomas M. Ripp, president of L-3 Security & Detection Systems. “We’re confident that our system’s complete capabilities will meet Pristina’s needs for many years to come.”

L-3’s eXaminer 3DX multi-slice CT technology generates full 3-D imaging and handles continuous in-line movement. Its MVT-HR offers advanced multi-view tomography, generating high-resolution images and integrating easily into any airport baggage handling system. Both solutions address emerging threats and improved performance through continued software updates. The OptEX ETD system detects explosives in less than four seconds without a reference library and without an ionizing radiation source. OptiNet is a total solution for an integrated baggage handling network of any size or scope. Designed to provide meaningful data from all security systems in the airport, OptiNet can efficiently and securely link up to 500 scanners, baggage viewing stations and search workstations on a single network.

L-3 SDS meets the most stringent explosives detection standards of regulators worldwide and is a leader in AT/CT systems, with an installed base of over 2,000 checked baggage systems.

About L-3 Security & Detection Systems

With more than 50,000 systems deployed and supported around the globe, L-3 Security & Detection Systems (L-3 SDS) is a leading supplier of security screening solutions. For more than 30 years, L-3 SDS has developed and manufactured cutting-edge products using advanced technologies that include 3-D computed tomography; automated, conventional and high-energy X-ray; radiation detection; active millimeter wave imaging; metal detection; and energetic trace explosives detection.

L-3 SDS solutions are used by the aviation and transportation industries, regulatory and customs authorities, government and law enforcement agencies, and commercial and other secure facilities. Applications include the screening of people, vehicles, baggage, cargo and packages for explosives, firearms, drugs, contraband and corporate assets.
