### **L-3 Security & Detection Systems Receives Order from German Ministry of the Interior for More Than 100 ProVision® Security Scanners**

WOBURN, Mass., February 12, 2015 – L-3 Security & Detection Systems (L-3 SDS) announced today that it has received orders from the Procurement Agency of the German Ministry of the Interior (MOI) for a combination of more than 100 ProVision® ATD and ProVision® 2 security scanners for primary screening at airports across Germany.

“We’re very pleased that the German MOI has adopted L-3’s ProVision platform as part of its strategy of enhancing both checkpoint security and the experience of airline passengers,” said Tom Ripp, president of L-3 Security & Detection Systems. “Our next-generation ProVision 2 is built on a flexible software platform that meets both ECAC CEP Standard 1 and Standard 2 requirements, allowing European airports to choose the configuration that best fits their security and operational needs.”

The image-free ProVision 2 system ensures passenger privacy with software that automatically detects both metallic and non-metallic threats. By indicating the location of detected objects on a generic mannequin, the system reduces the need for time-consuming and intrusive pat-down searches. The high-throughput ProVision 2 uses safe millimeter wave (MMW) technology and requires a simple single pose during a 1.5-second scan.

The ProVision ATD and the ProVision 2 have been successfully deployed in Germany for screening operations over the past year. With over 1,300 first-generation ProVision ATD systems and ProVision 2 systems procured at over 250 airports worldwide, the ProVision platform is the industry’s leading solution for safe and efficient advanced personnel screening.

#### **About L-3 Security & Detection Systems**

With more than 50,000 systems deployed and supported around the globe, L-3 Security & Detection Systems (L-3 SDS) is a leading supplier of security screening solutions. For more

than 30 years, L-3 SDS has developed and manufactured cutting-edge products using advanced technologies that include 3-D computed tomography; automated, conventional and high-energy X-ray; radiation detection; active millimeter wave imaging; metal detection; and energetic trace explosives detection.

L-3 SDS solutions are used by the aviation and transportation industries, regulatory and customs authorities, government and law enforcement agencies, and commercial and other secure facilities. Applications include the screening of people, vehicles, baggage, cargo and packages for explosives, firearms, drugs, contraband and corporate assets. To learn more about L-3 SDS, please visit the company's website at [www.L-3com.com/sds](http://www.L-3com.com/sds).

#### **About L-3**

Headquartered in New York City, L-3 employs approximately 45,000 people worldwide and is a prime contractor in aerospace systems and national security solutions. L-3 is also a leading provider of a broad range of communication and electronic systems and products used on military and commercial platforms. The company reported 2014 sales of \$12.1 billion.
